

# MERZ SVPK SOCKET DISTRIBUTORS

- Stackable – save valuable space during storage
- Light - no more heavy lugging, thanks to the light weight
- Sturdy - benefit from a longer service life
- Clever - each socket is easily accessible and protected due to the clever design

# THE SMALL AND STURDY ENERGY PARTNER

Whether indoors or outdoors, private or commercial - our SVPK Series socket distributors can be used practically anywhere. MERZ offers a wide range of solutions, especially for sectors such as construction and assembly, trade and industry, agriculture and the events business, as well as for applications in the municipal sector.

See for yourself the advantages of MERZ socket distributors and benefit from the uncomplicated power supply:

- Connected load from 11 to 22 kVA, socket outlets up to 32 A
- Can be optionally fitted with USB Type A 5 V/1 A charger module and RCD Type B
- Impact-resistant, heavy-duty and weatherproof plastic housing
- Splash-proof in protection rating IP44, protection class II
- Protective insulation, RCD and circuit breaker protected behind a built-in window
- Dimensions (H x W x D): 396 x 238 x 396 mm
- Storage: stackable on pallets with or without individual packaging (48 units) or alternatively in wire mesh boxes (30 units)

## 1 DISTRIBUTOR, 4 VERSIONS

Version with USB /  
Figure MZ69661

Version in black /  
Figure MZ696860002

Midnight Series version /  
Figure MZ696850009

Version in orange /  
Figure MZ69685

## FEATURES

- Portable - a carrying handle makes the compact distributors easy to transport
- Stackable - save valuable space during storage
- No more heavy lugging thanks to the low weight
- Sturdy - benefit from a longer service life
- Clever - each socket is easily accessible and protected due to the clever design
- Protective insulation, RCD and circuit breaker installed behind a window for protection
- Connected load from 11 to 44 kVA
- Socket outlets up to 63 A

## APPLICATION

Portable socket distributors as special power supply point in accordance with DIN VDE 0100 Part 704 for connecting AC and 3-phase AC consumers on construction sites, provided they are connected downstream of an incoming supply distribution cabinet, distribution cabinet or final distribution cabinet.
